Claud Monet

Project: Our project will be based on Monet's impressionistic style of using beautiful colors, working together to create other glowing colors, and create a Monet-like water scene.

Process: Find a photo that has water in it. We will be utilizing sponges and paint to create the Monet style of painting. This project will work best with paint. We will also use colored paper and blue painter's tape to create trees or another object. Once you are done painting remove the tape to show the "trees" in the color of the paper.

Materials: Photo of a water scene, a large piece of colored paper, blue painter's tape, old sponge cut into small pieces, acrylic, or any other paint.
