

Pablo Picasso

Project: Our project will be based on his cubist style, where subjects are analyzed and broken up into different sections. These sections are then put back together and painted from different perspectives and angles. This will be a mixed media project creating a cubist still life.

Process: Cut up colored paper - or paper you colored with paint. Paint an image - I did an apple - cut that up as well. Mix up the pieces and glue them down randomly on a new piece of paper or cardboard, creating your cubist still life. Fill in any areas with pastel, marker, or paint.

Materials: Paper - any color any size for cutting and one large piece of cardboard for your creating surface.
Scissors, glue, any color medium, paint, marker pastel
